

Technical Summary

General Concept

Mind Ease is an 'add on Security System' for automatic garage door openers. It can be installed on all existing automatic garage door openers and allows the home owner to set the delay to close, via an easily adjustable timer, from 5-60 minutes.

Safety

Important Note: ALL existing safety features on the garage door opener are active. Additionally, our product is safety tested and conforms to or exceeds all safety laws.

Installation

Mind Ease can be easily installed in 15 minutes.

Mind Ease can also be easily turned off at any time to allow the homeowner to keep his garage door open.

Electrical

Mind Ease runs off a Class 2 Power circuit and requires a 9-volt DC battery (battery not included).

Patent

Mind Ease has obtained legal protection for this technology and has a patent pending for North America as well as the United Kingdom.

Repair

Should there be any defective units or units that need repair, simply return them to Mind Ease for immediate replacement.

CAUTION

This unit must only be installed on UL approved automatic garage door openers with photo eye sensors.
